Contents of Volume 9

No. 1

Effect of the levels of dissolved oxygen on the expression of recombinant proteins in four recombinant *Escherichia coli* strains 1
X. Li, J.W. Robbins Jr. and K.B. Taylor (U.S.A.)

Optimisation of culture conditions for production of eicosapentaenoic acid by *Mortierella elongata* NRRL 5513 11
P.K. Bajpai, P. Bajpai and O.P. Ward (Canada)

Enhanced glucan formation of filamentous fungi by effective mixing, oxygen limitation and fed-batch processing 19
U. Rau, E. Gura, E. Olszewski and F. Wagner (Germany)

Fate in water of a recombinant *Escherichia coli* K-12 strain used in the commercial production of bovine somatotropin 27
G. Bogosian, P.J.L. Morris, M.D. Hale and J.F. Kane (U.S.A.)

Plasmid incidence and linear alkylbenzene sulfonate biodegradation in wastewater and pristine pond ecosystems 37
A. Breen, L. Jimenez, G.S. Sayler and T.W. Federle (U.S.A.)

Rapid identification of teleocidins in fermentation broth using HPLC photodiode array and LC/MS methodology 45
D.M. Sedlock, H.H. Sun, W.F. Smith, K. Kawaoka, A.M. Gillum and R. Cooper (U.S.A.)

Detoxification of polycyclic aromatic hydrocarbons by fungi 53
J.B. Sutherland (U.S.A.)

Chemical modification of the α-amylase of *Bacillus caldovelox* with diethyl pyrocarbonate: evidence for an essential histidine at the active site 63
F.J.D. Bealin-Kelly, C.T. Kelly and W.M. Fogarty (Ireland)

Some factors influencing the proportion of periplasmic hepatitis B virus pre-S2 antigen in the recombinant yeast *Hansenula polymorpha* 69
M.-R. de Roubin, M.D. Cailas, S.-H. Shen and D. Groleau (Canada, U.S.A.)

No. 2

Review
Clusters of genes for the biosynthesis of antibiotics: regulatory genes and overproduction of pharmaceuticals 73
J.F. Martin (Spain)

Original Papers
Antimicrobial activities of 2-arylthio-*N*-alkylmaleimides 91
Y. Igarashi and S. Watanabe (Japan)

Preparation of (S)-2,3-dichloro-1-propanol by *Pseudomonas* sp. and its use in the synthesis of (R)-epichlorohydrin 97
N. Kasai, K. Tsujimura, K. Unoura and T. Suzuki (Japan)

10-Hydroxy-8(Z)-octadecenoic acid, an intermediate in the bioconversion of oleic acid to 7,10-dihydroxy-8(E)-octadecenoic acid 103
C.T. Hou and M.O. Bagby (USA)

Cultivation of *Candida blankii* in simulated bagasse hemicellulose hydrolysate 109
P.S. Meyer, J.C. du Preez and S.G. Kilian (Republic of South Africa)

Laboratory-scale biosynthesis of *Trichoderma* mycolytic enzymes for protoplast release from *Cochliobolus lunatus* 115
P.Žnidaršič, A. Pavko and R. Komel (Slovenia)

Optimized protocol for the pilot-scale preparation of fungal cellulase 121
V. Ramamurthy, S.P. Thacker and R.M. Kothari (India)

Regulation of glucose and maltose transport in strains of *Saccharomyces* 127
J.R. Ernandes, T. D'Amore, I. Russell and G.G. Stewart (Canada)

Production of *Lactococcus lactis* biomass by immobilized cell technology 131
N. Morin, M. Bernier-Cardou and C.P. Champagne (Canada)

Composting of explosives and propellant contaminated soils under thermophilic and mesophilic conditions 137
R.T. Williams, P.S. Ziegenfuss and W.E. Sisk (USA)

Purification and properties of extracellular β-fructrofuranosidases from *Aureobasidium* sp. ATCC 20524 145
S. Hayashi, M. Nonoguchi, Y. Shimokawa, M. Tubouchi, Y. Takasaki and K. Imada (Japan)

Nos. 3–4

Reviews

Insect fungal symbionts: a promising source of detoxifying enzymes 149
P.F. Dowd (USA)

Biosensors for process monitoring 163
T. Scheper (FRG)

Original Papers

Formation of water-soluble *Monascus* red pigments by biological and semi-synthetic processes 173
T.F. Lin, K. Yakushijin, G.H. Büchi and A.L. Demain (USA)

Use of lignin-degrading fungi in the disposal of pentachlorophenol-treated wood 181
R.T. Lamar and D.M. Dietrich (USA)

Microbial biomass and community structure of a phase-separated methanogenic reactor determined by lipid analysis 193
D.B. Hedrick, T. White, J.B. Guckert, W.J. Jewell and D.C. White (USA)

Detoxification of sesquiterpene phytoalexins by *Gibberella pulicaris* (*Fusarium sambucinum*) and its importance for virulence on potato tubers 201
A.E. Desjardins, H.W. Gardner and K.-M. Weltring (USA, FRG)

Copper removal from an industrial waste by bioleaching 213
T.R. Clark and H.L. Ehrlich (USA)

Ecology of *Vibrio vulnificus* in Galveston Bay oysters, suspended particulate matter, sediment and seawater: detection by monoclonal antibody – immunoassay – most probable number procedures **219**
R.W. Vanoy, M.L. Tamplin and J.R. Schwarz (USA)

A simple method to study microbial coal solubilization using Pluronic F-127-amended media **225**
K. Subburaj, S. Jayaraman and M. Gunasekaran (USA)

Changes in protein composition of *Saccharomyces* brewing strains in response to heat shock and ethanol stress **229**
J.A. Odumeru, T. D'Amore, I. Russell and G.G. Stewart (Canada)

Conversion of sodium cyanide to carbon dioxide and ammonia by immobilized cells of *Pseudomonas putida* **235**
G.R.V. Babu, J.H. Wolfram and K.D. Chapatwala (USA)

Isolation and characterization of a novel polysaccharide from *Bacillus licheniformis* NCIB 11634 **239**
N.K. Ebube, O.K. Udeala and A.A. Ghobashy (Nigeria)

Immobilizatyion of β-fructofuranosidase from *Aureobasidium* sp. ATCC 20524 on porous silica **247**
S. Hayashi, T. Hayashi, J. Kinoshita, Y. Takasaki and K. Imada (Japan)

Effect of deglycosylation on the properties of β-fructofuranosidase *P*-1 from *Aureobasidium* sp. ATCC 20524 **251**
S. Hayashi, M. Nonoguchi, Y. Shimokawa, Y. Takasaki and K. Imada (Japan)

Short Communication
Production of microbial levan from sucrose, sugarcane juice and beet molasses **257**
Y.W. Han and M.A. Watson (USA)
